AI AND THE WORKPLACE

Presented by Jeremy York,
SHRM-SCP, SPHR,
Lead Consultant & President of
InvigorateHR

Artificial Intelligence (AI) is revolutionizing how organizations operate across all departments and functions. AI technologies are being leveraged to reduce human bias in decision-making, increase operational efficiency, enhance stakeholder relationships, improve regulatory compliance, drive data-driven strategies, and facilitate continuous learning and development. As AI continues to evolve, understanding its implications for our workforce and business processes becomes crucial. Organizations must learn to harness AI's potential while being mindful of its limitations and associated risks.

Thursday, March 20, 2025
11:30 am - 1:00 pm
